

- Commodities symbols are created in three parts: the root symbol, the month code and the year code.
 - The month code - each month is represented with a single letter as displayed below:

F - January	J - April	N - July	V - October
G - February	K - May	Q - August	X - November
H - March	M - June	U - September	Z - December
 - The year code - is displayed as one digit. Hence 2008 would be displayed as 8, and 2009 as 9

For example: US (T-Bond) June 2008 would be displayed as **USM8**.
US is the commodity code
M is the month of June
8 is for the year 2008

Cash contracts, when available, can be obtained by prefixing Y0 (zero) to the commodity code in place of the month and year code.

Chicago Board of Trade - Mini Data (CBOTM)

Symbol	Name	Grouping
YM	Mid-Sized (\$5) Dow Industrials	Indices
